Thesis Title: The role of Jordanian hospital nurses in promoting patients' health

Supervisors: Dr Shona Cameron, Professor Barbara McAfee, Dr Margaret Leppard

Brief Synopsis of Research:

The thesis examined nurses' roles in health promotion in a large teaching hospital in Jordan. Using a case study design and triangulated methods approach, the study involved four phases. The first phase examined nurses' role in health promotion using focus group discussions (n=8), non-participant observations and semi-structured questionnaires. The second phase focused on patients' understanding of health and health promotion using focus group discussions (n=8). The third phase examined health promotion from the perspective of hospital stakeholders and a nursing educationalist. The fourth phase included documentary review of nurses' job descriptions and nursing philosophy of care. The thesis develops a conceptual model illuminating Jordanian hospital nurses' role in health promotion together with contributing factors.

Prof. Noordeen Shoqirat

Mutah university/Faculty of Nursing, Po:box: 61710, Jordan

Dec 2006-Aug 2007 Clinical Team Leader at Erskine Hospital, Edinburgh, UK

This position involved-

- Arranging personal centred care plans for a wider range of elderly cases.
- Supervising carers and staff nurses and identifying any learning needs.
- Working with residents' families and external health professionals to ensure that all aspects of residents' health needs are met.
- Ensuring that all carers and staff nurses are well supported and encouraged to work as a team.

This position called upon many skills I had learned as part of my nursing degrees and tested my ability to put them into practice in a 'real world' situation. I feel this position greatly enhanced my communication and leadership skills.

Oct 2005-April 2006 RGN Clinical Neuroscience Department/ Western General Hospital, Edinburgh, UK

My duties and responsibilities involved-

- Offering acute care for patients with neurosurgical problems such as brain and spinal cord tumours, hydrocephalus and all types of brain injuries.
- Working with a multidisciplinary team (e.g. neurosurgeons, physiotherapists) and external organisations to ensure the best standards of care are delivered to patients.

Mainly, this position has enabled me to cope of with the patients' care demands in a busy NHS hospital. Thus, I developed further my time management skills and prioritising tasks strategies.

Sep 1999- Oct 2002 1999-2002: Senior SN / Neuro ICU _ Jordan University Hospital.

This position involved similar responsibilities to above but with more Involvement in mentoring nursing students, junior nurses and managing resource at the unit level.
